Word of Gen. Carrette cicion as to the form diplomatic negotiations for the settlement of pected today at the state department. It is thought probable the de facto government will authorize Eliseo Artalk matters over informally with act-

ing secretary Polk. Officials expect that the Carransa government will again offer the border cantonment plan which first was prestated at the El Paso conference tween Maj. Gen. Scott and the Mexican war minister, Gan. Obregon. It was rejected at that time because immediate withdraway of Gen. Pershing's men from Mexico was stipulated by Gen. Dhregon as a condition.

The horder cantonment plan, as out lined by Gen. Obregon, would provide for large garrisons of American troops along the border, with corresponding garrisons of Mexican troops directly opposite; each to notify the other of bandit movements, and each to attack handlis on its own soil, but not to cross to the soil of the other nature.

U. S. to Require Guarantees.

While it is admitted that the United States would under some conditions be inclined to favor assistance of American financiers in tiding the Carranaa government over its present libancial crisis, it was made plain at the state department Friday that guarantees of the security of foreign life and property would be required before such assistance could be extended.

Also, it would be necessary for the Carranaa government to furnish some assurance of the continued Joyalty of Carranaa civil and military officials in various parts of the nation before the United States government would teel inclined to recommend the risking of American capital in the rehalibitation of the affairs of the southern republic. The flower of the German army has been brought forward to oppose them, and guns and ammunition are being used lavishly.

According to reports from Holland, Belgium has been denuded of German soldiers to meet the Anglo-French of-fensive and the railway stations, even in the larger towns, are guarded by the older reservists. Small Gains Pleasur.

In London the reports of the British commander. Gen. Sir Douglas Hals, commander. Gen. Sir Douglas Hais, are awaited eagerly and although the arrival of the wounded tells the price which is being paid for the advance, the news of the small gains is being received with quiet satisfaction.

Notwithstanding the chormous call on German reserves for the battle in Picardy, the German crown prince has resumed the offensive at Verdun and yesterday made further repeated attacks near Thinument work without meting any success.

Russians Galuige Repidly.

Russians Gaining Rapidly.

In the sant things are moving rapidly. The Russians are making prostres in their drives against the important railway junctions at Delatyn in Galicia, Korel in Volhynia, and Baranovichi, north of the Pripet marshes.

Little news has been revelved in regard to the frighting in the region of Baranovichi. In Galicia and Volhynia, however, the Tentons admit the withdrawal of their line, the retirements having been forced by the rapid advance of the Russians in Galicia, and the successful manner in which they dealt with the German counter offensive on the Lutar sector.

Delatys Surrounded. Russians Gaining Rapidly.

Delatya Surrounded. Delatys Surrounded.

According to unofficial reports, Delatyn is surrounded on three sides and the Russians, have cut out the east-eramost lines of retreat across the Carpathians, are on the finnks of the Austrians new defensive lines running through Stanislau and Halier, Genvon Bothmer may be compelled to fall back even further before he reaches safety.

Advancing all along the line of the Lursk salient, the Russians are now threatening Kovel from three points. Capture of prisoners continues, and according to Russian estimates, the total for a month's fighting is not far short of a quarter of a million.

British Capture 20 Guss.

British Capture 20 Guns. The operations of the British army on the front of the Ancre and Somme rivers, has again been impeded by unusually heavy rain, the war office atoonced today.

During the last few days the British have captured 10 guns and 51 machine guns.

The announcement follows:

"A very heavy rain which fell on the afternoon and evening of yesterday impeded operations and between the Ancre and the Somme the night was chiefly spent in improving the forward positions guined in yesterday's fighting.
"In the neighborhood of Gomme-court we bombarded the onemy's trenches with field guns and trench motturs."

Mexico City, Mex., July 8.—Great joy was manifested here over the receipt Friday night of the American note accepting the proposal of Gen. Carranza for a settlement of matters in dispute by diplomatic negotiations.

Governors of various Mexican states teligraphed the de facto government, congrantifating it on the favorable response from the United States.

Paris, France. July 8.—The French are watching with admiration the fight of the British troops in the sector north of the Somme river. The great natural and artificial difficulties with which they have to contend are realized and all agree that they are doing as much as humanly possible. French military opinion is that the German positions are so strong and so well furnished with lines of communication that the British will be unable to accomplish but little more until the heavy French gailent whence they can enfilled the German positions opposed to the British. As these guns of 305 and 600 millimeters are mounted on railroad trucks, time is revired to lay the tracks for their movement, which has to be done carefully. The French are so solidly established that the work soon will be completed and it is asserted that these guns will not be long in making their influence felt.
